

London Calling!

A stunning new build, modern contemporary home on the edge of Richmond Park in London is the perfect fit for Amina Invisible Loudspeakers providing great sound reproduction with no visible intrusion into its minimalist interior design.

This cutting edge, yet classic, five bedroom Richmond Town House is of uncompromising build quality, incredible architectural integrity and enviable specification. Inside the emphasis is on contemporary open spaces, uncluttered by walls, pillars or radiators, all complemented by excellent natural light.

The sense of space and openness is enhanced by the roomy three floor design, rather than the four floor format common in neighbouring properties.

Alternatively, when entertaining guests, ceiling mounted speakers provide high quality sound unobstructed by a room full of people.

The owner is particularly pleased with how the sound permeates throughout the house even into the hallway and stairwell where no speakers are installed, allowing guests to effortlessly enjoy music as they mingle and move about the entire house.

"I am delighted with the quality of sound produced by the ceiling mounted Amina speakers in the kitchen, particularly with such challenging room acoustics; they blend seamlessly with the outdoor speakers".

The result is an owner absolutely delighted with the outcome, a fully automated family friendly modern town house with high quality invisible sound and mood lighting throughout complementing the minimalist décor. A perfect property to raise a family in, and to entertain family and friends in style.
